

Fire Extinguisher and Emergency Evacuation chair/slide Awareness 3 hour in house session

This is a great alternative to fire training refreshers, to be able to get hands on experience!!

This means your staff understand the capabilities and limitations of various extinguishers and highlights safe use.

To practice evacuating a building and utilising escape chairs or slide sheets to assist is once again something that is often **talked about but not practically used.**

All persons at work and especially newly appointed staff need to have a basic understanding of fire precautions and the actions to be taken in the event of a fire.

Due to the practical elements this course acts as a great team building session for your workforce

Session Overview

- Introduction to the course
- Legislation
- Basic fire awareness suitable to your workplace
- Understanding fire spread and ways to slow this down
- Responsibilities of all staff regarding fire prevention
- Fire fighting equipment: types, uses & practical use of various types
- Conduct a fire evacuation with feedback if required
- The importance of maintenance of external/internal exits; staircases; waste management
- Evacuation slide sheets (SkiPad) practical use or Evacuation Chair practical use

Fire extinguishers that will be used will be water and CO2

Assessment and certification after completing the training session successful candidates receive a certificate of attendance valid for three years.
